Disclaimers →

For all windows and doors, manufacturing tolerances are +/- 1/8". It is recommended that when ordering your windows "exact size", that you factor in a 1/4" down size (width and height) from your opening.

Spreader bars are required on all 4 Track Vertical Windows and Trapezoid Windows 30" or wider, all Lip Frame Windows 42" or wider, all Horizontal Slider Windows 42" or higher, and all door window inserts 30" or wider.

Inswing Doors are highly recommended to use a threshold. French Door kits come with astragal bar and note operating door location (OSL). Note if any windows and doors will be mullered vertically and allow 2" for mull when calculating sizes - if unsure see PC Architectural Pack.
